

**Status Report
County of Ventura
Greenhouse Gas Emissions Inventory**

October 2009

Prepared by:

**Ryerson, Master and Associates Inc.
735 State Street, Suite 407
Santa Barbara, CA 93101-5503
(805) 730-1338 (ph)
(805) 730-1341 (fax)**

1. Introduction

This document summarizes the progress to date on development of the County of Ventura's Greenhouse Gas Inventory. The inventory is being prepared following guidance in the current versions of the ARB's Local Government Operations Protocol (LGOP) and The Climate Registry's General Reporting Protocol (GRP).

2. Reporting Boundaries Established

Through discussions with the Project Steering Committee and Public Works/Real Estate Services, Ryerson identified the reporting boundaries for the County, based on an operational control approach as required by the Local Government Operations Protocol. This information was provided to the Steering Committee in August 2009.

3. Facilities List Finalized

The GRP requires reporters to report their emissions separately for each facility. In general, a facility is defined as a single physical premises, generally understood to be on a single site or on contiguous or adjacent sites. The use of facility-based reporting is also useful for organizations that wish to allocate emissions across departments and agencies.

Much of Ryerson's activities to date have been focused on developing a consistent year-to-year facility list, including both owned and leased facilities, beginning with CY 2000. We have done so by collecting and comparing information from five sources:

- The Risk Management Agency provided a list of facilities that is used for insurance purposes. This list was provided to Agencies and Departments for confirmation and information on facility changes from CY 2000 forward.
- Public Works' Real Estate Services provided a list of leased facilities, including those leased by and leased to the County.
- Southern California Edison provided a list of facilities and associated electricity use for CYs 2005 through 2008.
- The Southern California Gas Company provided a facility list as part of their delivery of data on natural gas consumption from CYs 2000 through 2008.
- GSA's list of facilities used to calculate and analyze electricity use in County owned facilities.

Ryerson has compared these various data sources against each other. The result is considered to be a comprehensive list, although there are always risks associated with facility identification when it comes from multiple sources. Our finalized list of facilities for CY 2005 forward is attached as Appendix A. The County owns or operates approximately 160 individual facilities, in addition to lighting, traffic signals, sprinklers, pumps and other small sources, which can be aggregated for GHG reporting purposes. The majority of these facilities have been in operation since CY 2005.

4. Identification of Mobile Sources Close to Completion

GSA has provided Ryerson with a complete list of fuel use and mileage for vehicles under GSA control, for CYs 2000 through CY 2008. This is broken down by fuel and vehicle type. GSA provides fuel to all County operations, excluding the Fire Department. It also provides fuel for non-County uses, which have been backed out from the totals.

We have requested data from the Fire Department on fuel use for CYs 2000 through CY 2008. We have received CY 2008 data and have made two or three requests for prior year fuel consumption, but have not received those records to date.

5. Base Year Identification Issue

The Board of Supervisors has directed County staff to work towards establishing CY 2000 as the County base year. Following this direction, RMA worked with the County's CEO and GSA to collect data on electricity and natural gas use for the 9 calendar years.

Following standard practices, GSA requested historical, meter-based data from Southern California Edison and the Southern California Gas Company. The Gas Company has provided full records; SCE indicated it was unable to provide data prior to 2005. GSA has maintained records of electricity usage since 2000 and provided Ryerson with an account-based data set from 2000 forward, for GSA managed buildings only. It is our understanding that this does not include any of the facilities owned and operated by the Health Care Agency, Airports, and Harbor.

The absence of SCE historical data is significant and may affect the ability to identify 2000 as the County's base year. It is our understanding that the Health Care Agency facility records from CY 2006 and back may not be available.

One alternative is to seek approval from the Board to identify CY 2005 as the base year. Unfortunately, this would not allow the County to account for the energy efficiency improvements made in the first four years of the decade, some of which were substantial.

An alternative would be to work with the Auditor Controller's Office to retrieve historical records. Since it is unlikely that any summary level data would include kWh data (financial systems normally track costs only), reconstructing the electricity use for HCA, Airports and Harbor would require a review of all SCE invoices to document the kWhs billed for each account not included in the GSA historical list. The first step would be to identify the records retention policy on original invoices.

6. Outstanding Data Requirements for Scopes 1 and 2

After meeting with the Health Care Agency, Ryerson provided a list of requested data, primarily related to small sources. It may be necessary to meet with the Agency again, to review data requests and address the availability of electricity records for CYs 2000 through 2004.

As noted above, Ryerson is seeking fuel data from the Fire Department for CYs 2000 through 2007.

We are scheduling follow up meetings/phone calls with Airports and Harbor, to address small sources and to explore record keeping on electricity use, in the event that the County proceeds with a decision to establish 2000 as its base year.

GSA has provided Ryerson with a list of suppliers and purchase order numbers for miscellaneous gases. The purchase orders do not include gas volumes. The alternatives are to contact the vendors (there are a limited number) to request records of deliveries or to work with the Auditor Controller's office to identify paid invoices associated with the purchase order numbers.

7. Scope 3 – Employee Commute

The County's HR department released a survey on employee commutes in summer 2009. While the survey was not designed with GHG reporting in mind, Ryerson reviewed the survey questions to determine if they could be quantified for carbon footprinting purposes. The conclusion was that they did not provide adequate data for that purpose. Due to vacation schedules during the summer, Ryerson was unable to meet with VCTC to discuss their survey results. Over the next two weeks, Ryerson will work to establish a meeting time, after which a decision will be made about whether VCTC data can be used to estimate emissions associated with employee commutes.

If the decision is made to develop a separate survey, Ryerson will work with the County to identify the best path forward for that effort.

8. Next Steps

While efforts are underway to identify the base year and to refine the inventory data, Ryerson proposes to convene a meeting of the project steering committee (including representatives from the CEO and GSA). The purpose of the meeting will be to review preliminary data on emission levels and to develop a detailed strategy for establishing reduction targets, including identifying the best means of involving County decision makers in the discussions.

Attachment "B" provides a revised schedule for project completion. Some dates are yet to be determined, depending upon the outcome of decision on base year.

Attachment B
Revised Time/Deliverable Schedule

Task/Deliverable	Proposal Date	Comment	Proposed Date
Kick Off Meeting	June 29, 2009	Completed	Completed
Detailed Workplan	July 2, 2009	Delay due to contract negotiations	Completed
Identification of Reporting Boundaries (consult GSA, County Counsel, CEO, HCA, PWA/Real Estate Services)	July 6, 2009 – July 17, 2009	Discussions held during weekly meeting. Preliminary reporting boundaries established – additional work needed re Health Care Agency and potential closed landfills	Completed
Preliminary Data Collection on Electricity and Natural Gas Use – Central Records	July 6, 2009 – July 17, 2009	Focus is on ensuring full list of facilities for County going back to CY 2000. Working with Risk Management list, to be confirmed by Agencies and in discussion with Real Estate and GSA	Delayed – development of facility list more extensive than anticipated and lack of SCE 2000-2004 data resulted in requirement to address missing data
Boundaries and Span Workshop (County)	July 21, 2009	Second meeting held with CAP Team	Completed
Boundaries and Span Workshop (HCA)	July 23, 2009	Being set up by CEO	Discussed during Sept Team Meeting
Preparation of Organizational Boundaries Rationale Document	July 6, 2009 – July 27, 2009	Internal RMA draft completed – draft excluding HCA to be delivered	Completed
Organizational Boundaries Rationale Document	July 27, 2009	Dependent upon timing of discussions with HCA	Completed
Proposed base year – recommendations on transitional/historic years	July 27, 2009	Dependent upon timing of discussions with HCA – HCA-exclusive will be available end of August	Dependent upon decision on retrieving SCE data
Completion of data collection from central sources	August 7, 2009	To complete after confirmation of 8 year facilities lists	Underway
Development of Agency-Specific Data Collection Tools	August 3, 2009 – August 14, 2009	Underway through screening discussions with Agencies	Completed
Proposed Site Visit List/Checklist and Points of Contact for Meetings/Telephone Calls	August 3, 2009	Meetings underway as part of screening, timing moved up to accommodate early visits	Completed

County of Ventura GHG Inventory
 October 2009 Status Report
 Attachment B: Revised Time/Deliverable Schedule

Task/Deliverable	Proposal Date	Comment	Proposed Date
Site Visits and Data Collection	August 3, 2009 – September 25, 2009	Additional meetings may be required to deal with individual/unique agencies like Fire, HCA	Completed – two or three additional meetings may be needed to address missing data
Mid-point Status Report/Meeting	September 2, 2009		Delayed, delivered October 30, 2009
GHG Inventory Report Writing	September 28, 2009 – October 2, 2009	Could be delayed by two weeks, dependent upon meetings with HCA and data from SCE and SoCal Gas	Delayed
GHG Inventory Draft Report	October 2, 2009		Delayed
Review of Inventory Draft by Steering Committee	October 2, 2009 – October 11, 2009		Delayed
Final GHG Inventory Report	October 23, 2009		Delayed
Development of Economic Growth and GHG Forecasts	September 21, 2009 – October 2, 2009		Delayed to November 2009
Draft background paper on forecasts and targets	October 2, 2009 – October 12, 2009		Delayed to November 2009
Steering Committee meeting on Forecasts and Targets	October 14, 2009		Delayed to November 2009
Staff Workshop on Forecasts and Targets	November 4, 2009		Delayed to November or Early December 2009
Preparation of Background Documentation and Board of Supervisors Memorandum Material	November 4, 2009 – November 18, 2009		Early December 2009
Presentation to Board of Supervisors on Forecasts and Targets	December 1, 2009		TBD
Steering Committee Meeting on Emissions Reductions/Criteria	December 8, 2009		TBD
Development of Preliminary Reduction Measures (proposed)	August 3, 2009 – December 7, 2009		TBD
Staff workshop on Emission Reduction Measures	December 10, 2009		TBD
Drafting of Final Emission Reduction Plan	December 11, 2009 – December 31, 2009		TBD

County of Ventura GHG Inventory
 October 2009 Status Report
 Attachment B: Revised Time/Deliverable Schedule

Task/Deliverable	Proposal Date	Comment	Proposed Date
Draft Final Emissions Reduction Plan (Climate 20 by 2020)	December 31, 2009		TBD
Steering Committee meeting to review plan and Board of Supervisors presentation material	January 7, 2010		TBD
Final Presentation to Board of Supervisors	January 28, 2010		TBD
Ryerson Master Workshop on Climate Adaptation	February 17, 2010		TBD
